ABSTRACT

The Dayak Punan are one of the Dayak ethnic groups in Kalimantan. The native tribes who have a lifestyle of moving from one place to another in forest areas or along rivers. To fulfill their life necessities, people still use traditional methods such as farming, hunting and gathering. There are companies that open businesses in various fields, one of the fields is coal mining, namely Berau Coal Inc. The company has social and environmental responsibility or know as Corporate Social Responsibility (CSR) for the impact of mining activities. One of the CSR programs is the relocation of Dayak Punan tribe, because the area that they occupy is included in the company's concession area so they are relocated to several areas, one of the areas is Sambakungan Village km 2 Lati. The purpose of this program is so that the community is not being left behind and has a better in the future.

This study aims to identify changes in life, especially in the terms livelihoods and technology that is used by the Dayak Punan after the relocation of their settlement. This research method uses ethnographic. The subject of this research is 1 representative of PT. Berau Coal and 5 representatives of the Punan Dayak which selected by purposive sampling technique. The data collection methods that used in this study is interview techniques, literature study, observation and documentation. The analytical technique that was used in this study is the domains and taxonomies analytical techniques.

The results of the study show changes in the life of the Dayak Punan community after relocation from various fields such as the economy (livelihood) which are starting to be vary with the aim of fulfilling all of the necessities of life can be met and the technology used to survive life after relocation. However, there are 2 families who have an old way of life, which is believing in their ancestors.
