<b>Article Info</b>	<b>ABSTRACT</b>	
<b>Article history:</b> Received: Maret, 2021 Revised: Maret, 2021 Accepted: Maret, 2021	<b>This research is related to the high divorce rates in several districts and cities in East Borneo Province. The subjects of this research were 100 early adulthood women in the Province of East Borneo. The sampling technique used in this research was purposive sample. The measuring instruments of this research used family harmony scale, emotional maturity scale and religiosity scale. Those scales arranged with Likert model scale and the research data was analyzed with multiple regression by the program Statistical Package for Social Science (SPSS) 24.0 for windows. Research result of this research indicate that there was an effect of emotional maturity and East Borneo with a significant score <math>p = 0.000</math>, <math>F = 89.524</math> and score <math>R^2 = 0.649</math>. In emotional maturity toward family harmony there was an positive effect and significant with score beta = 0.374, <math>t = 5.449</math> and score <math>p = 0.000</math>. In religiosity towards family harmony there was an positive effect and significant with score beta = 0.000, <math>t = 8.116</math> and score <math>p = 0.000</math>.</b>	
<b>Keywords:</b> Family harmony Emotional maturity Religiosity		
<b>ABSTRAK</b>	<b>Kata kunci</b>	
Penelitian ini berkaitan dengan tingginya angka perceraian di beberapa kabupaten dan kota di Provinsi Kalimantan Timur. Subjek penelitian ini adalah wanita dewasa awal di Provinsi Kalimantan Timur sebanyak 100 subjek. Teknik sampling yang digunakan dalam penelitian ini adalah purposive sample. Alat ukur dalam penelitian ini menggunakan skala keharmonisan keluarga, skala kematangan emosi dan skala religiusitas. Skala tersebut diukur dengan skala model likert dan teknik analisa data penelitian ini menggunakan uji regresi ganda dengan bantuan program Statistical Package for Social Science (SPSS) 24.0 for windows. Hasil dari penelitian ini menunjukkan bahwa terdapat pengaruh kematangan emosi dan religiusitas terhadap keharmonisan keluarga pada dewasa awal di Provinsi Kalimantan Timur dengan nilai signifikansi $p = 0.000$ , $F = 89.524$ dan $R^2 = 0.649$ . Pada kematangan emosi terdapat pengaruh positif dan signifikan terhadap keharmonisan keluarga dengan nilai beta = 0.374, $t = 5.449$ dan nilai $p = 0.000$ . Pada religiusitas terdapat pengaruh positif dan signifikan terhadap keharmonisan keluarga dengan nilai beta = 0.000, $t = 8.116$ dan nilai $p = 0.000$ .	Keharmonisan keluarga Kematangan emosi Religiusitas
