| <p>Article Info</p> <p>Article history: Received dd/mm/yy Revised dd/mm/yy Accepted dd/mm/yy</p> <p>Keywords: Conscious behavior Environment stress Flood-affected society</p> | <p>ABSTRACT</p> <p>The purpose of the research was to test empirically the correlation of environmentally conscious behavior and environment stress against society flood-affected in Sempaja Selatan Village. This research used a quantitative approach. The subject in the research were 100 peoples flood-affected in Sempaja Selatan, Samarinda city used simple random sampling technique. The data were collected by scale of conscious behavior and environment stress. Technique analysis in this research using correlation product moment. The data collection method in this study using a test or try out technique with N = 40. The results of the reliability test on the environmental stress scale have an alpha value of 0.846 > 0.600 which means reliable and the environmentally conscious behavior scale has an alpha value of 0.676 > 0.600 which means reliable. The results of this study indicate that there is no relationship between environmentally conscious behavior and environmental stress in flood-affected communities in Sempaja Selatan Village with an r-count value of 0.007 and P = 0.941 > 0.05.</p> |

| <p>ABSTRAK</p> <p>Penelitian ini bertujuan untuk menguji secara empirik hubungan antara perilaku sadar lingkungan dan stres lingkungan pada masyarakat terdampak banjir di Kelurahan Sempaja Selatan. Penelitian ini menggunakan pendekatan kuantitatif. Subjek penelitian ini adalah 100 masyarakat terdampak banjir di Kelurahan Sempaja Selatan di Kota Samarinda dengan menggunakan teknik simple random sampling; data dikumpulkan menggunakan skala perilaku sadar lingkungan dan stres lingkungan. Teknik analisa dalam penelitian ini menggunakan korelasi product moment. Metode pengumpulan data yang digunakan pada penelitian ini menggunakan teknik uji atau try out dengan N=40. Hasil uji reliabilitas pada skala stres lingkungan memiliki nilai alpha 0,846 > 0,600 yang berarti andal dan skala perilaku sadar lingkungan memiliki nilai alpha 0,676 > 0,600 yang berarti andal. Hasil penelitian ini menunjukkan tidak terdapat hubungan antara perilaku sadar lingkungan dan stres lingkungan pada masyarakat terdampak banjir di Kelurahan Sempaja Selatan dengan nilai r hitung 0,007 dan P = 0,941 > 0,05.</p> | <p>Kata kunci: Perilaku sadar lingkungan Stres lingkungan Masyarakat terdampak banjir</p> |
