| <p>Article Info</p> | <p>ABSTRACT (10 PT)</p> | |
| <p>Article history: Received dd/mm/yyyy Revised dd/mm/yyyy Accepted dd/mm/yyyy</p> | <p>This study was conducted to determine the correlation between conformity and compliance to run the health protocols of Covid 19 in Samarinda communities. This study utilized quantitative approach. The study sample was 10 Samarinda citizens. It was selected using purposive sampling technique. Meanwhile, the data collection method used the scale of compliance and conformity with the value of the relocation of the total of the value of the alpha standard is 0.966 > 0.700 and the value of the feasibility of the total value of the value conformity and total alpha of 0.895 > 0.700. To analyze the data, pearson product moment was utilized as the data analysis technique. The result of the study revealed that there was a positive and significant relationship between conformity and compliance to run the protocols of health COVID-19 in Samarinda communities to the value of the count $r = 0.852 > r$ table 0.1 and $p\text{-value} 0.01$. It indicates that the higher the conformity made the higher level of compliance to run the covid-19 health protocol by the Samarinda citizens.</p> | |

| <p>ABSTRAK (10 PT)</p> | | |
| <p>Penelitian ini bertujuan untuk mengetahui hubungan konformitas dengan kepatuhan menjalankan protokol kesehatan COVID-19 pada masyarakat di Kota Samarinda. Penelitian ini menggunakan pendekatan kuantitatif. Sampel penelitian ini adalah 10 masyarakat yang tinggal di Kota Samarinda. Dipilih dengan menggunakan teknik purposive sampling. Metode pengumpulan data yang digunakan adalah skala kepatuhan dan konformitas dengan nilai realibilitas total skala kepatuhan nilai alpha sebesar 0.966 > 0.700 dan nilai realibilitas total skala konformitas nilai alpha sebesar 0.895 > 0.700. Teknik analisis data yang digunakan adalah analisis korelasi pearson product moment. Hasil penelitian menunjukkan bahwa ada hubungan yang positif dan signifikan antara konformitas dengan kepatuhan menjalankan protokol kesehatan COVID-19 pada masyarakat di Kota Samarinda dengan nilai hitung $r = 0.852 > r$ tabel sebesar 0.187 dan nilai $p = 0.010$ ($p < 0.050$). Artinya semakin tinggi konformitas yang dilakukan maka semakin tinggi pula tingkat kepatuhan menjalankan protokol kesehatan covid-19 oleh masyarakat Kota Samarinda.</p> | | |
