# ARTIKEL PENELITIAN

Kontrol Diri dalam Perilaku Perundungan Maya pada Remaja Akhir Pengguna Media Sosial TikTok

ATTAYA MAHDIYA HANIN, ANDREAS AGUNG KRISTANTO, DIAH RAHAYU, & MIRANTI RASYID Departement of Psychology, Faculty of Social and Political Sciences, Mulawarman University, Samarinda, Indonesia

ABSTRACT
TIKTO social media contains various video uploads, and the application algorithm adjusts each user's
content preferences through for your pages (FYP). The TikTok mechanism provides an opening for
cyberbullying behavior by perpetrators who lack self-control, such as in the late adolescent
development plasse Late adolescents aged 18-21 years should have achieved full self-control. There are
many underlying factors such as behavioral, cognitive, and decision control. This research uses a
correlational quantitative approach. The results of the research slowed that of the 104 late tens, there
were 66 late teens (63.5%) in the high category for cyberbullying behavior, and 77 late teens (72.1%)
in the medium category for self-control. The Spearman's Rho correlation test shows a correlation
coefficient is -0.638. The factors that dominate the reasons for bullying are that the perpetrators do not
like them and the desire to achieve personal pleasure. The erefore, it is expected that late adolescents will
be able to regain self-control.

Keywords: cyberbullying, late adolescence, self-control, social media TikTok

ABSTRAK
Media osaisi ITKTok yang berisi unggahan-unggahan video beragam variasi, dan algoritma aplikasi yang menyesualkan preferensi konten tiap-tiap penggunanya melalui for your pagee (FVP). Mekanisme TikTok tersebut menjadi cehal terjadinya perlalua perundungan maya oleh pelaku yang kurang memiliki kontrol diri, seperit pada fase perkembangan remaja akhir. Remaja akhir dengan rentang usia B-21 tahun yang sehansunya sudah mengani pengendalian diri penuh. Terdapat banyak faktor-faktor yang mendasari seperti kontrol perilaku, kognitif, dan keputusan. Penelitain ini menggunakan penelekatan kanistatif Korelasional. Hasil penelitain menunjukkan abawa dari 104 remaja akhir, featspat sebanyak 66 remaja akhir (63.5%) kategori tinggi berperilaku perundungan maya, dan sebanyak 77 gemaja akhir (74.5%) kategori sedag nutuk kontrol dirinya. Pada uji korelasi psoemman's Rho menunjukkan koefisien korelasi sebesary -0.638. Faktor yang mendominasi ahasan para pelaku perundungan adalah korban yang kurang disukai dan keinginan mencapai kesenangan pribadi. Oleh karena itu, dihiraplan remaja akhir fapat kembali mengelola kontrol diri.
