permissive parenting,  
self-control

#### ABSTRACT

This study aims to find out the influence of permissive parenting and self-control on cyberbullying behavior in late adolescent perpetrators in Samarinda City. This research uses a quantitative approach. The subjects of this study were 124 adolescents with the late adolescent age category in Samarinda City who were selected through purposive sampling technique. The measuring instrument used in this study used a cyberbullying behavior scale, a permissive parenting scale, and a self-control scale. Data analysis technique using multiple model regression statistical test. The results of full model showed that there was an influence between permissive parenting and self-control on cyberbullying, namely the calculated F value = 117.540 > F table = 3.02, R square = 0.661 and p = 0.000. In the results of the stepwise model regression test, there is a significant effect between permissive parenting and cyberbullying behavior, namely beta value (β) = 0.350, t count = 4.964 > t table = 1.980, and p = 0.002. Then on self-control with cyberbullying behavior showed a significant effect, namely beta values (β) = -0.538, t count = -3.629 > t table = 1.980, and p = 0.000.

#### ABSTRAK

Penelitian ini bertujuan untuk mengetahui pengaruh pola asuh permisif dan kontrol diri terhadap perilaku cyberbullying pada pelaku usia remaja akhir di kota Samarinda. Penelitian ini menggunakan pendekatan kuantitatif. Subjek penelitian ini adalah 124 remaja dengan kategori usia remaja akhir di kota Samarinda yang dipilih melalui teknik purposive sampling. Alat ukur yang digunakan dalam penelitian ini menggunakan skala perilaku cyberbullying, skala pola asuh permisif, dan skala kontrol diri. Teknik analisa data menggunakan uji statistik regresi model berganda. Hasil penelitian model penuh menunjukkan terdapat pengaruh antara pola asuh permisif dan kontrol diri terhadap perilaku cyberbullying pada pelaku usia remaja akhir yaitu dengan nilai F hitung = 117,540 > F tabel = 3,02, R square = 0,661 dan p = 0,000. Pada hasil uji regresi model bertahap didapatkan adanya pengaruh signifikan antara pola asuh permisif dengan perilaku cyberbullying yaitu nilai beta (β) = 0,350, t hitung = 4,964 > t tabel = 1,980, dan p = 0,002. Kemudian pada kontrol diri dengan perilaku cyberbullying menunjukkan pengaruh yang signifikan, yaitu nilai beta (β) = -0,538, t hitung = -3,629 > t tabel = 1,980, dan p = 0,000.

#### Kata kunci

perilaku cyberbullying, pola asuh permisif, kontrol diri
