 Female Student Victim Of Violence

**ABSTRACT**  
 Cases of violence against women can occur in the personal realm in realm of education. Not a few cases of violence are found in Mulawarman University, but many of the victims choose silence so that they can continue their studies normally. The resilience of female students to survive and overcome the problems they face cannot be separated from family support. Main function of the family is protection and love, where this function can be a factor in the formation of an individual's resilience for survival, face, and overcome the problems experienced. This research aims to know the effect of family support on resilience of female student who are victims of violence in Mulawarman University. The research used a quantitative approach. The subjects of this research were 100 female students who are still studying in Mulawarman University. The subjects were selected using purposive sampling technique. The data collection method used are family support scale and resilience scale. The collected data was analyzed by simple regression analysis test with the help of Statistical Package for Social Sciences (SPSS) program as a for windows. The result showed that  $F(1, 99)$  value of 0.000 < 0.005 it means that there is a significant effect on family support for resilience of female students who are victims of violence in Mulawarman University. The direction of the relationship between the two variables is positive, which means that the higher the family support, the higher the resilience level of a student. The value of adjusted square is 0.430, meaning that the effect of family support on resilience is 43.0%.

**ABSTRAK**  
 Kasus kekerasan terhadap perempuan banyak ditemukan di Indonesia terjadi pada ranah personal hingga ranah pendidikan. Faktanya tidak sedikit kasus kekerasan ditemukan di Universitas Mulawarman, namun banyak diantara korban memilih diam agar dapat melanjutkan kuliahnya secara normal. Resiliensi mahasiswa untuk bertahan dan mengatasi masalah yang dihadapinya tidak terlepas dari dukungan keluarga. Fungsi utama keluarga salah perlindungan dan cinta kasih, dimana fungsi tersebut dapat menjadi faktor dalam pembentukan resiliensi seorang individu agar mampu bertahan, menghadapi dan mengatasi masalah yang dialami. Penelitian ini bertujuan untuk mengetahui pengaruh dukungan keluarga terhadap resiliensi mahasiswi korban kekerasan di Universitas Mulawarman. Penelitian ini menggunakan pendekatan kuantitatif. Subjek penelitian ini adalah 100 mahasiswa yang masih kuliah di Universitas Mulawarman. Subjek dipilih dengan menggunakan Teknik purposive sampling. Metode pengumpulan data yang digunakan adalah skala dukungan keluarga dan skala resiliensi. Data yang terkumpul dianalisis dengan uji analisis regresi sederhana dengan bantuan program Statistical Package for Social Sciences (SPSS) 22.0 for windows. Hasil penelitian menunjukkan bahwa nilai  $F(1, 99)$  sebesar 0.000 < 0.005 yang berarti bahwa terdapat pengaruh yang signifikan pada dukungan keluarga terhadap resiliensi mahasiswi korban kekerasan di Universitas Mulawarman. Arah hubungan kedua variabel positif, yang berarti semakin tinggi dukungan keluarga, maka semakin tinggi pula tingkat resiliensi seorang mahasiswa. Nilai adjusted square adalah 0.430, artinya pengaruh dukungan keluarga terhadap resiliensi yakni sebesar 43.0%.
