**Keyword:**  
Academic Resilience, Academic Stress Covid-19 Pandemic

**ABSTRACT**  
This study aims to find the correlation between academic resilience and academic stress of students working on a thesis during the ongoing COVID-19 pandemic. Respondents of this study were 120 respondents who were college students from universities in Samarinda. This research uses quantitative approach with correlational research design. Research instrument used an academic stress scale and an academic resilience scale. Data analysis in this study used Kendalltau correlation test. Results of this study, there is a negative and significant correlation where the values of  $r = -0.774$  and  $p = 0.000$ , mean that if college students have a high level of academic resilience, then students are likely to have a low level of academic stress, during the completion of the final thesis project during the COVID-19 pandemic.

**ABSTRAK**  
Penelitian ini bertujuan mengetahui hubungan yang terjadi antara resiliensi akademik dan stres akademik mahasiswa mengerjakan skripsi selama masa pandemi covid-19. Responden penelitian ini sebanyak 120 responden mahasiswa dari universitas X di Samarinda. Penelitian ini menggunakan metode kuantitatif dan korelasional. Instrumen penelitian ini menggunakan skala stres akademik dan skala resiliensi akademik. Analisis data dalam penelitian ini menggunakan uji korelasi Kendalltau. Hasil penelitian terdapat hubungan negatif dan signifikan yang antara resiliensi akademik dengan stres akademik mahasiswa dimana nilai dari  $r = -0.774$  dan  $p = 0.000$ , yang berarti jika mahasiswa memiliki tingkat resiliensi akademik yang tinggi maka mahasiswa memiliki tingkat stres akademik yang rendah.

**Kata Kunci**  
Resiliensi Akademik; Stres Akademik; Pandemi Covid-19
