ABSTRACT

This research aims to find out how plastic waste management through the ecorbrick method in Dadi Mulya Village, Samarinda City and the inhibiting factors of the implementation of this program. This research uses descriptive qualitative methods and simple determination using purposive sampling techniques, with a research focus on plastic waste management through the ecorbrick method in Dadi Mulya Village, Samarinda City which includes socialization and education as well as the application of plastic waste management through the ecorbrick method in Dadi Mulya Village, Samarinda City and inhibiting factors in the running of this program. The data collection techniques used are observation, interviews and documentation. The data analysis used is the interactive model data analysis developed by Miles and Huberman. The results of the study found that this program has been carried out in Dadi Mulya Village by some of its citizens through socialization and education and the application that has been carried out which includes sorting waste and the process of making ecorbrick. Other things that hinder the running of this program are the lack of public awareness and interest in managing waste, especially plastic waste, and socialization that is not carried out thoroughly.

Keywords: management, plastic waste management, ecorbrick

ABSTRAK

Penelitian ini bertujuan untuk mengetahui bagaimana pengelolaan sampah plastik melalui metode ecorbrick di Kelurahan Dadi Mulya Kota Samarinda serta faktor penghambat dari pelaksanaan program ini. Penelitian ini menggunakan metode deskriptif kualitatif dan penentuan sampel menggunakan teknik purposive sampling, dengan fokus penelitian yaitu pengelolaan sampah plastik melalui metode ecorbrick di Kelurahan Dadi Mulya Kota Samarinda yang meliputi sosialisasi dan edukasi serta penerapan pengelolaan sampah plastik melalui metode ecorbrick di Kelurahan Dadi Mulya Kota Samarinda dan faktor penghambat terlaksananya program ini. Teknik pengumpulan data yang digunakan yaitu observasi, wawancara dan dokumentasi. Analisis data yang digunakan adalah analisis data model interaktif yang dikembangkan oleh Miles dan Huberman. Hasil penelitian ditemukan bahwa program ini telah dilaksanakan di Kelurahan Dadi Mulya oleh sebagian warga melalui sosialisasi dan edukasi serta penerapan yang telah dilakukan yang meliputi penulisan sampah serta proses pembuatan ecorbrick. Hal lain yang menjadi penghambat terlaksananya program ini yaitu kurangnya kesadaran dan minat masyarakat dalam mengelola sampah khususnya sampah plastik, serta sosialisasi yang tidak dilaksanakan secara menyeluruh.
