PERAN FOODBANK OF INDONESIA DALAM MENGATAS FOOD LOSS AND

WASTE TAHUN 2020-2021

Abstract: Food Loss and Waste (FLW) is a global issue because it is one of the problem in the era of globalization. The FLW issue is a problem that continues to grow adong with the inevane in human population in the world and a strengthened by the influence of globalization. In the 2011 FAO report, to revoluping countries experienced greater levels of food waste compared to revoluped countries. This is due to low food processing sechnology and offereneuture, low public awareness about food management, and limited dequate recovery.

adequate resources on paone awareness arous jood managemen, and united adequate resources on the earth, including an increase in CO2 due to an increase in the volume of waste, waste of world air in the farming process, wasting of millions of gallows of peroleum daving the farming process and food distribution and environmental pollution daving the farming process and food distribution and environmental pollution daving the farming process and food distribution and environmental pollution date to organic substances in food waste that cannot be processed. FLW contributes amond 8% of the world greenbows gas emissions, with a total of 1.3 billion tomes of food waste omnually. One non-governmental organization that apparate in the social screen and anaw to reduce FLW is Foodbank Indionesia (FOI). FOI is a non-profit social organization whose mission is to hamper, expectably in poor communities and improve children's mixtleno, FOI in line with the 2nd Sastamishi Development Good (SDSs) of the United Nations (I/N), anamely zero humper. FOI focuses on managing excess food supplies so that they are not wasted by carrying out quality children and the identity. This sufficient is a significant role in the FLW issue that occurs in Indionesia which is curried out with program synergy as a form of comminent to the SDGs to be free from hanger.

Keywords:Food Loss and Waste, Indonesia, Foodbank of Indonesia

Food Loss and Waste (FLW) merupakan salah satu permasalahan dalam era globalisasi. FLW dimaknal berbeda antar keduanya. Food Loss merupakan sampah maknan yang berasal dari bahan pangan mentah yang rusak selelum diolah menjadi maknan hingga akhirya dibang dan menjadi sampah, sementara Food Waste adalah maknan yang sap dikonsumsi namun tidak dimakan atau tersisa sehingga dibanang dan menjadi sampah, sementar Food Waste.

Di Indonesia timbunan sampah makanan menyumbang sebanyak 44% dari total keseluruhan sampah nasional pada tahun 2018 berdasarkan data Kementrian Lingkungan
