ARTICLE INFORMATION	ABSTRACT
Vol. 10, No. 11 Page Published	This research aims to find out and describe village government cooperation in making the family planning program a success in Sengun Village, Muaja WAK District, Kutai Kertanegara Regency, as well as to identify the obstacles faced. This type of research uses a qualitative descriptive method, such as research focus, namely to describe and planify as well as identifying factors that help to overcome collaboration in the success of family planning programs in Indonesian Village, Muaja WAK District, Kutai Kertanegara Regency. In this study the key informants were the Head of Village and Community Services, Village Government Staff, Head of the Department and Family Welfare Mobilization Team, Members of the POK Mobilization Team, and other informants, namely the community. The collection techniques used were observation, interviews, and documentation. The data analysis used is an interactive model developed by Miles, Huberman, and Saldaña. However, the content of abstracts in this article can help policy implementers to find out deficiencies and what needs to be improved in cooperation to make the family planning program successful in Sengun Village, Muaja WAK District, Kutai Kertanegara Regency.
